DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Han US 6,125,193 A. Han shows all of the features of the instant invention including 3D x-ray or CT imaging of tissue with high-density objects where the high-density object is segmented using thresholding, border marking, and forward projection; suppressing the high-density object and substituting with data equivalent to neighboring data; then combining the high-density data with the data excluding the high-density data for reconstruction (abstract, figure 2, figure 3, column 1 line 35 through column 2 line 22, column 3 line 51 through column 4 line 7, and column 5 lines 9-26). Ramp filtering along the rows, *i.e.* in the direction of rotation, is inherent in standard filtered back projection.
